SKILLS

- Swift (UIKit)
- MVC, MVVM
- CoreData, SQL
- Firebase
- URLSession, Alamofire
- Programmatic UI
- Reactive Programming

EDUCATION

Computer Engineering (3rd Year)
Pamukkale University, GPA: **3.2**
2020 - Present

ORGANIZATIONS

PauSiber
Core - Team Member
2022 - present
The courses I have given:
- Git & GitHub for everyone (2023)

LANGUAGES

Turkish
English

OSMAN EMRE OMURLU

iOS Developer

PROFILE

I am passionate about developing creative and innovative apps. My interest in software comes from my desire to constantly improve myself, and I use my interests to enhance both myself and my skills. I enjoy teamwork and working with people so, I contribute to open source projects and activities from time to time.

PROJECTS

Video Games Explorer Feb, 2024   >Go to project (GitHub)

This is a video game discovery and search app. It was built with MVVM architecture. This app has no external any dependencies.
- Fully programmatic UI.
- CoreData for database.
- Clean code with using protocols.
- Paid attention to retain cycle for avoiding memory leaks.
- Clean network layer with sublayers using URLSession.
- Pagination, Dispatch Group and error handling with Alerts.

DergiCE Jan, 2024   >Go to project (App Store)

DergiCE is my freelance project on the App Store and it is about magazine and news. It was built with MVC architecture.
- OneSignal for push notifications.
- StoreKit for in-app rating.

Yummy Meals Dec, 2023   >Go to project (GitHub)

This is a food ordering app. It was built with MVVM architecture and Repository pattern. The UI was created with Storyboard and XIB.
- Compositional layout for aesthetic UI.
- Generic network layer with Alamofire.
- Firebase for authentication and real-time database.

Movie World Mar, 2023   >Go to project (GitHub)

This is a movie discovery app. It was built with MVVM architecture. The UI was created with Storyboard and XIB.
- Firebase for authentication and real-time database.
- Generic network layer with Alamofire.

Bazaar Bundle Feb, 2023   >Go to project (GitHub)

This is a e-commerce app. It was built with MVC architecture. The UI was created with Storyboard and XIB.
- Firebase for authentication and real-time database.
- Generic network layer with Alamofire.
